To Whom It May Concern

We wish to express our deep disappointment with PG&E and your commission for allowing this poor piece of proposed regulation to proceed as far as it has gone. The sad part in this case is that you might ruin one of California's most beautiful lakes (Lake Almanor). Also you might ruin one of the true trophy fisheries left in the state (Butt Lake). The worst irony is that if this plan advances the very people it damages would have to pay for this nonsense through higher utility rates.

The overwhelming evidence supports stopping this proposal. It seems that it must be stopped many times. Why? Your own commission has ruled against it before. None of the residents of Lake Almanor favor it. Please let common sense triumph. Kill this proposal for all time!

Coy and Linda Johnson
