DEPARTMENT OF ENERGY
REGULATORY COMMISSION

Please put a stop to the ridiculous plan of putting cold water thermal curtains on Lake Almanor and Butt lake.

Why ruin the environment of two beautiful lakes and create the very same problems you are trying to eliminate down stream. Especially, when there is no evidence that the water was cooler before the power facilities were installed, and no evidence of any significant trout kills.

Why spend so much money to change our environment that has maintained itself so well for so many years, when there is no significant evidence that it would change anything. I hope it is not a plan for someone to make money!!!

Sincerely,
Charles Maraldo
