

ATTN: FERC Project 2105

ORIGINAL 23 Oct '04

To Whom It May Concern:

Please support the movement: SAVE LAKE ALMANOR!

If the bottom "cold water" is drawn from the lake with "Therma" ("Curtains") the following will result:

FILED  
OFFICE OF THE  
SECRETARY

2004 NOV - 11 P 11:44

FEDERAL ENERGY  
REGULATORY COMMISSION

1. The lake level will drop
2. The lake will become a warm "bath tub"
3. The good fishing will be lost.
  - a. The salmon population will drop 40%
  - b. The smelt population will be lost
4. Algae will grow abundantly
5. Water quality will be affected
6. Lake Almanor Basin land values will go down
7. Tourist numbers will fall
8. Business will decline
9. Jobs will be lost
10. Income will decline
11. The Maidu Indian sacred grounds will be mistreated
12. There is no guarantee that water temperature 40 miles downstream will drop 1 degree especially with a drought or in warm summer months.
13. PG&E rate payers will pay \$54 million for this questionable experiment

Sincerely

Vincent Sansone, MD
