To Whom It May Concern:

I wish to voice my opposition to the thermal curtain that is being considered for Lake Almanor, Plumas County. (FERC Project Number 1962 and 2105) I have been a part time resident at this lake since 1952, a permanent resident since 1994, and 4 generations of my family have enjoyed every aspect of this lake for over 50 years.

This project has the potential of being an environmentally damaging activity, not to mention the \$40 million dollar price tag. For me, (as a resident, and as a PG&E customer, who will have to foot the bill of such an absurd project) this is a "double whammy!"

Please do what you can to assure that I and my grand children will be afforded the same love for the area that we have always had.
