FEDERAL ENERGY
REGULATORY COMMISSION

(Attn: FERC Project 2105)

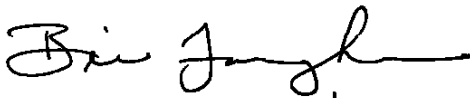

To Whom It May Concern,

We are writing to express our strong opposition to the FERC Project 2105 proposal to install "thermal curtains" in Lake Almanor and Butt Lake as part of the PG&E relicensing of the Feather River project.

We are property owners at Lake Almanor and are very concerned at the many potentially negative impacts of this proposal. Lake Almanor is a tremendous and growing asset to the state of California as a recreation and retirement area. Installation of these experimental thermal curtains poses significant risk to the ecology and recreational value of the lake.

We urge you to please look into this matter and look forward to your help in stopping this ill-advised plan.

Sincerely,

Bill and Maryl Faraghan
