FEDERAL ENERGY
REGULATORY COMMISSION

SAVE LAKE ALMANOR & BUTT LAKES

Plans are underway to install a "Thermal Curtain" to permit the removal of approximately half of the cold water from Lake Almanor & Butt Lakes, in hopes that it will lower the temperature one to two celsius in the lower Feather River, for the improvement of trout fishing.

Your attention and concern over this most foolish plan will be appreciated.

Please review the attached information.

Thank you.

Greatly Concerned.
