Re: Upper North Fork Feather River Project, FERC Project No. 2105

Ms Bose,

As a property owner and a lifelong visitor to Lake Almanor (including the town of Chester), in California, it will be devastating to the economy and our family if additional releases of cold water are released from the lake.

During your review of the Project 2105 Licensing, we ask that you do the following:

Honor and uphold the April 22, 2004 Settlement Agreement filed on behalf of the Project 2105 Licensing Group addressing reservoir lake levels, stream flows below project dams, water quality monitoring, wildlife habitat enhancement, and recreation enhancements.

Not allow any additional releases of cold water from Lake Almanor beyond that agreed to in the 2004 Settlement Agreement. The quality of water in Lake Almanor and the health of our fisheries are critical to our economy, our businesses and the quality of life of the families in our community.

Thank you for your consideration in this matter.

Sincerely,

LaRon V. Golden
