**RE: Project 2105 - Upper North Fork Feather River Hydroelectric Project**

Please do not go forward with this plan. We are once again in a drought year, the water levels are low, the water temperature is already warmer than normal and we are concerned with the algae, the impact on the fishing industry here and the impact it will have on the local residents who depend on tourism to keep them going.

The proposed changes will have a devastating effect on the local economy. We have already seen what has happened to Clear Lake and its economy. Please help us to preserve the wonders of Lake Almanor, its lake, surroundings and help the local residents who depend on this Lake for their future.

I OPPOSE Alternatives 1 and 2 of SWRCB's 2014 draft and also Alternative 3 of SWRCB's 2020 draft. I urge the State Water Board to only consider PG&E's project as submitted and approved in the Settlement Agreement of April 22, 2004 without the additional release of cold water from Lake Almanor.

Sincerely,

*Betsy & Wolfe  
Tim & Wolfe*
