P-2105

Dear FERC Commissioners,

I live in the Lake Almanor area and am concerned that special interests (i.e., white-water rafters) have, so far, been able to derail/delay re-licensing of Lake Almanor by making noise over downstream water temperatures when there are ways to reduce downstream water temperatures (e.g., restoring river banks, and vegetation) without destroying our local fisheries and economy.

During your review of the Project 2105 Licensing, I ask that you do the following:

- Honor and uphold the April 22, 2004 Settlement Agreement filed on behalf of the Project 2105 Licensing Group addressing reservoir lake levels, stream flows below project dams, water quality monitoring, wildlife habitat enhancement, and recreation enhancements.
- Not allow any additional releases of cold water from Lake Almanor beyond that agreed to in the 2004 Settlement Agreement. The quality of water in Lake Almanor and the health of our fisheries are critical to our economy, our businesses and the quality of life of the families in our community.

Thank you for your consideration in this matter.

Sincerely,

  
John M. Green
