MEMO RE: FERC Project Number 2105

My wife and I are elderly retired residents of Plumas County. Over our many years we have witnessed many wild schemes proposed by governing bodies and other influential entities (such as P G & E), and FERC Project # 2105 is right up there with the worst. Nothing will be accomplished..

Why in Heavens name ruin Lake Almanor and Butt lake for a few fiskermen who MIGHT stop by to fish along Feather Rive some time. The residents of this area have paid dearly for their properties, pay a lot of taxes, and now, if the Project is approved, will pay P G & E millions to construct this ridiculous water curtain. This is a retirement community. People on fixed incomes can not afford to pay for such folly, and even if they can, what's the purpose? After the water has traveled all that distance it could be warmer than when it started!

Please help stop this tragic nonsense. Thank you for your attention.
