520 MAIN ST., ROOM 309 ♦ QUINCY, CALIFORNIA 95971 ♦ (530) 283-6170 ♦ FAX (530) 283-6288

On January 8, 2002 the 2105 Committee; formally appointed by the Board of Supervisors, presented their goals and objectives to PG&E for inclusion in the Application. The Committee has always maintained consistency in relation the core values:

- Water Level Operations Agreement
- Water Quality Monitoring Program
- Comprehensive Recreation Plan
- Public Access
- Erosion
- Public Safety
- Incremental Improvements Plan

Lake Almanor water levels are of vital interest to the citizens of Plumas County as the lake levels affect recreational usage, shoreline erosion, public safety, lake access and shoreline property values. Water quality degradation has the potential to affect aquatic life in the Lake Almanor, Butt Valley Reservoir and the Feather River, which in turn could affect recreational usage due to reduced angling opportunities and a less desirable destination. Changes in Lake Almanor water levels, particularly during the recreation season (i.e., Memorial Day weekend through mid-September), could adversely affect the aquatic habitat, the recreational experience, and property values around the lake.

As the representatives of the local public, including property owners, residents, visitors, recreation dependent businesses, Plumas County and it's Flood Control District, requests status as an intervener in this proceeding; requests copies of all filings made as a part of this proceeding, and requests the opportunity to be heard before decisions are made regarding any issue which would change the manner in which the project is operated.

Notices and Service of Documents may be made to:

Respectfully submitted,

Robert Shulman
