2 **Figure 1-1. General site location of the Upper North Fork Feather River**

3 **Hydroelectric Project..... 2**

4 **Figure 3-1. North Fork Feather River hydroelectric projects..... 26**

5 **Figure 3-2. Lake Almanor (NF1) end-of-day water surface elevation and**

6 **storage, WY 1970-2003..... 35**

7 **Figure 3-3. Vertical profiles of water temperature for Lake Almanor near**

8 **Canyon dam, 2001 50**

9 **Figure 3-4. Total WUA values for species and lifestages evaluated (one velocity**

10 **calibration method) in the Seneca reach. 102**

11 **Figure 3-5. Total WUA values for species and lifestages evaluated (one velocity**

12 **calibration method) in the upper Belden reach. 103**

13 **Figure 3-6. Total WUA values for rainbow trout spawning as evaluated**

14 **(one velocity calibration method) in the Seneca reach 105**

15 **Figure 3-7. Total WUA values for rainbow trout spawning as evaluated**

16 **(one velocity calibration method) in the upper Belden reach. 105**

17 **Figure 3-8. Total WUA values for species and lifestages evaluated**

18 **(one velocity calibration method) in lower Butt Creek 110**

19 **Figure 3-9. PG&E and FS public recreation sites in the UNFFR**

20 **Project vicinity 176**

21 **Figure 3-10. Proposed recreation facility improvements and key viewing**

22 **points in the UNFFR Project area..... 195**

LIST OF TABLES

1

2 **Table 1-1. Actual and projected generation resources in the California-Mexico**

3 **Power Area 4**

4 **Table 1-2. Actual and forecasted generation, demand, and reserve capability for**

5 **CA/MX and WECC 4**

6 **Table 3-1. Meteorological summary for Chester, California 29**

7 **Table 3-2. Summary of daily average flow discharge (cfs) data, by month and overall,**

8 **for the project vicinity 30**

9 **Table 3-3. Summary of Lake Almanor end-of-day water surface elevations, WY 1970-**

10 **2003 36**

11 **Table 3-4. PG&E water rights for the UNFFR Project 39**

12 **Table 3-5. Water quality criteria for the UNFFR Project..... 42**

13 **Table 3-6. Range of general water quality parameters measured in project waters by**

14 **PG&E in 2000 45**

15 **Table 3-7. Monitoring locations for Commission-approved Rock Creek-Cresta water**

16 **temperature monitoring plan and summary of daily average water**

17 **temperatures for continuous monitoring in June through September of 2000,**

18 **2001, and 2002 48**

19 **Table 3-8. Summary of dissolved oxygen concentrations monitored by PG&E during**

20 **2000 53**

21 **Table 3-9. Summary of total coliform and fecal coliform densities monitored by**

22 **PG&E during 2000 to 2002..... 57**

23 **Table 3-10. Fish and crayfish tissue analysis results for silver, mercury, and PCBs in**

24 **Belden forebay and Belden reach, and various sample action, allowable,**

25 **and screening levels, August 2001 61**

26 **Table 3-11. Fish tissue bioaccumulation screening-sampling protocols..... 70**

27 **Table 3-12. Sulfide and dissolved iron and manganese concentrations in Lake Almanor**

28 **and the Seneca reach, August to November, 2001..... 80**

29 **Table 3-13. Fish species identified in recent surveys (1996-2002) of waters in the**

30 **UNFFR Project..... 89**

31 **Table 3-14. Species composition and relative abundance in Seneca reach, Belden reach,**

32 **upper Butt Creek, and lower Butt Creek, 2000–2002 93**

33 **Table 3-15. Total number of trout (rainbow and brown) caught by anglers in project**

34 **waters surveyed in 2000, by size range..... 94**

35 **Table 3-16. Recommended minimum flow releases from Canyon dam (Seneca reach) as**

36 **measured at gage NF-2..... 99**

1	Table 3-17.	Recommended minimum flow releases from Belden dam (Belden reach) as measured at gage NF-70.....	99
