Sensitive Fishery & Wetland Habitat

Spawning Suitability

Derived from PG&E Internal Elevation Data

Substrate Slope

- 0 - 15 degrees
- 15 - 30 degrees
- 30 - 45 degrees

Suitable Spawning Areas Derived from Water Depth (0.5 to 5 meters below surface)

- High Lake Level (4494 feet)
- Intermediate Lake Level
- Low Lake Level (4468 feet)

Fisheries At Lake Almanor
